## Mixed Division 3:

Due to the number of teams entered in Mixed Division 3, not all the pools were the same size, some teams played 3 matches while other played 4.

Finishing positions took this into account by dividing the league points by the number of matches a team had played. In the case of a draw, sets for and against, and then total points for (divided by the number of matches played if the teams in question played a different number of matches) was then used.
